Set Up Secure Authentication

Secure Authentication is a service to help protect you from fraudulent online activity. It also helps us ensure that only authorized individuals can access financial information online. Setup is easy. You simply:

- ▶ **Set up a security phrase and challenge questions.** These questions may be asked during the signon process to confirm that an authorized individual can access financial information online.
- ▶ **Register your personal computer (optional).** We ask that you register computers you commonly use to access your financial information online. This authorization helps us ensure that only recognized locations are accessing your information online.
